

Inspire2Live Principles

We're the patient voice in cancer

Inspire2Live is an independent, international, not-for-profit movement that brings together patients, advocates, researchers, clinicians, industry, regulators, funders and policymakers to help bring cancer under control. We exist to ensure that the patient perspective drives research, innovation, implementation, and policy. Organizations and individuals who choose to work with Inspire2Live are expected to embrace and actively support these principles and values.

Patients First: Every decision starts with the interests of people affected by cancer. We focus on outcomes that improve life, care, and opportunity for patients and their loved ones.

Collaboration Without Borders: Cancer is a global challenge. We connect people, organizations and expertise across countries, disciplines and sectors because lasting progress requires collective action.

From Discovery to Impact: We accelerate the translation of science into accessible, affordable and sustainable solutions. Research must lead to real-world benefits for patients.

Open Sharing: We encourage the responsible sharing of knowledge, data, ideas and results. Progress happens faster when people collaborate openly and learn from one another.

Independent Activism: We challenge barriers, outdated thinking, and unnecessary obstacles that delay better outcomes for patients. We are constructive, courageous, and patient-driven.

Innovation and Learning: We support scientific excellence, creative thinking, and the development of the next generation of patient advocates, clinicians, and researchers.

Integrity: We act transparently, responsibly and independently, using our resources and partnerships to maximize patient benefit.

Shared Commitment: Partnership within Inspire2Live is based on shared values. Members and partners are expected to uphold these principles, support collaboration, promote openness, and contribute to advancing the patient's voice in cancer.

Our Commitment

We will connect people, share knowledge, remove barriers and drive action so that every person affected by cancer can benefit from the best science, the best care and the strongest patient voice.

We are the patient's voice in cancer!
